

Postcodes in China (Simplified)

Listed in Postcode Order from 0100xx to 8607xx

Jun-19

Note: Chinese postcodes are 6 digits long, this simplified version only covers the first 4 digits, so all those underneath are also treated the same way in 100 number blocks (e.g. 8480 = 848000 to 848099)

Note: Gaps in number ranges are intentional (e.g. 0104-0110 are not currently used and are available for expansion areas)

Note: 100600 (exact code, not a range) is exclusively for **diplomatic and foreign institutions** (regardless of actual location in Beijing), with preferential (priority) delivery.

Note: There are 2,350 postcode areas listed here and each covers 100 postcode areas, making around 235,000 postcode districts.
